

AgriSafe Serves PA Farmers

AgriSafe Network is a national 501©3 nonprofit that works to educate healthcare professionals and agricultural workers about the health and safety needs of those in the ag industry.

In summary, AgriSafe will provide the following services:

1. **AgriStress Helpline** AgriSafe provides a comprehensive agricultural hotline to provide mental health crisis response. The helpline has 24/7 coverage and ability to respond in 160 languages. Staffed by mental health professionals trained to respond appropriately to agricultural communities, this helpline focuses on mental wellbeing for agricultural communities one call at a time.
2. **FarmResponseSM**
AgriSafe provides professional development for 250 healthcare professionals in Pennsylvania to improve agricultural mental health care. This unique training improves the cultural competencies and understanding of the stressors that are impacting agricultural producers, workers, and their families for healthcare professionals working in hotline, emergency, primary care, and behavioral health services.
3. **Cultivating a Healthy MindSM Curriculum**
AgriSafe supports agricultural youth mental health in PA through our *Cultivating a Healthy Mind* curriculum for agricultural educators, mentors in 4-H and FFA and young producers. Youth are taught to identify unhealthy stress and incorporate coping skills to last into adulthood. AgriSafe provides the Train the Trainer course, training materials, and classroom content supporting agricultural educators. Approximately 250 educators will be trained and 100 students trained.
4. **QPR for Farmers and Farm Families**
AgriSafe will train PA agricultural communities to effectively intervene suicide. This training is an *agricultural specific* with evidenced based QPR that is culturally relevant illustrating the current agricultural mental health crisis through story vignettes and moving videos. 250 will be trained on QPR.
5. **Total Farmer Health Coach**
Total Farmer Health Coaches are certified through AgriSafe's Nurse Scholar program. The Coach model is innovative and relatable for agricultural communities through partnering and collaborative problem solving. AgriSafe Coaches support their communities through holistic helping partnerships to motivate meaningful change when facing mental and physical stress.
